mental illness function and thrive
in the community.*

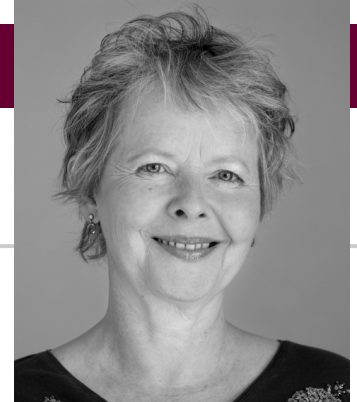

Continuous

TREATMENT TEAM SERVICES

Supporting individuals in achieving recovery and growth beyond illness so they may enjoy the best quality of life possible.

As a part of Park Center's Adult Community Services continuum, we offer case management services through our Continuous Treatment Team (CTT).

This service assures continuity of care for seriously and chronically mentally ill adults. Case management and follow-up services are designed to support independent living, community reintegration, and enhance quality of life.

The Continuous Treatment Team staff give assistance with all problems that may arise from the day-to-day realities of community living, from basic daily living skills development to complex clinical, behavioral, and legal issues.

CTT staff members consist of highly trained professionals who have years of experience working in the case management field. This team primarily serves individuals who have reached some level of stability in the community, but still require on-going treatment and support.

Customer-centered support is tailored to each individual's needs. CTT promotes recovery and enables illness self-management. We emphasize hope, recovery, empowerment, and effective rehabilitation founded on a partnership between the person receiving services and the treatment team. By learning about mental illness and how to identify and cope with symptoms, life can become more enjoyable and rewarding, and fulfilling dreams can become a reality.

Services include the following:

- Recovery planning
- Crisis intervention and crisis management
- Medical management and education
- Illness education, including symptom identification & management
- Collaboration with other health care providers
- Case management, employment services, and peer counseling
- Skills training
