

# THREE WISHES

## EARLY CHILDHOOD THERAPEUTIC DAY TREATMENT

Children who have experienced abuse, neglect, or other traumatic experiences are sometimes not able to successfully adjust in traditional child care programs due to emotional or behavioral problems.

*Park Center offers specialized services that can help change the lives of children and their families.*

## THREE WISHES Early Childhood Therapeutic Day Treatment

All children  
have many  
wishes -  
but three stand  
out for most  
children:  
to learn,  
be loved,  
and to be safe.

**Park Center offers a licensed therapeutic program serving children ages 3 to 6 with behavioral and psychiatric problems - problems that prevent them from attending a regular preschool or daycare center.**

Appropriate referrals may have histories of physical or sexual abuse, neglect, emotional traumatization or demonstrate atypical behaviors that require a therapeutic program. Some examples of behaviors displayed are kicking, hitting, and biting. The child may or may not have a diagnosis, but could have struggles getting along with others, learning social skills, following directions, or cooperating with authority.

The program provides a daily monitoring process of the child's emotional status, also including:

- **Basic skill-building**
- **Cognitive and developmental stimulation**
- **Therapeutic treatment in a nurturing environment**
- **Individual & family therapy, case management services and parent support groups**

Our goal is for the child to be able to enter a regular preschool or public school and have the skills to be successful in obtaining their education and function well socially.
